

A stacked bar chart illustrating the distribution of variation across four categories. The bar is divided into four horizontal segments of different colors: teal for 'Between species (65%)', light blue for 'Phenology within species (19%)', yellow for 'Treatments within species (2%)', and pink for 'Unexplained individual level variation (14%)'. The segments are stacked from top to bottom in that order.

Category	Percentage
Between species	65%
Phenology within species	19%
Treatments within species	2%
Unexplained individual level variation	14%

Between species (65%)

Phenology within species (19%)

Treatments within species (2%)

Unexplained individual level variation (14%)
